All,
Just wanted to bring you all up to date on the radio. The process is we submit some paperwork to FEMA so that they can check if they have one of these radios in their inventory. That has been done and we are awaiting FEMA's reply. However, we are pretty sure that they are not likely to have the radio in their inventory so we have simultaneously initiated a PR for the radio's replacement. Let me know if you have any questions.

Althea:

Can you tell me what the status is of the purchase of the radio for Harris County for the one that got drowned in Bravo?

I am not sure if we can have Harris County purchase the radio and then bill us (ERRS) contractor for the radio. We would have to see if this is allowable through the CO.

Either way, we need to get this done.

Warren: Any comments on this?

Thanks
Gary Moore

Gary,

As per our conversation.

Here is the information for the hand held radio to be replaced in Harris County (lost by EPA personnel). Harris County will likely want to keep their service agreements and warranties with their current radio vendor. So this should probably be a sole source purchase from the same Harris County vendor.

If the Finance section agrees, the best option might be to allow Harris County to put in the purchase order with their vendor so they are sure that they are getting the correct items listed. The radio vendor can invoice the ERRS contractor directly, who can then be reimbursed through the current system.

Let me know your thoughts.

Joe

Derek and Joe:

Attached is a write up from Mike S. (Region 2 EPA) summarizing the incident and a signed 213RR with appropriate specifications, model numbers, accessories etc. to do an "in kind" replacement for lost asset.

Warren
Bravo BD

The radio used by OCR Team 7 provided by Harris County was accidentally dropped into the ship channel while I was crossing over to the platform vessel to return to the decon-pad. It was attached to one of the clip attachment points on my backpack by the belt-snap-clip on the back of the radio. After I crossed over one of the crew handed over the backpack and the radio hit the side rail on the platform popping the clip causing it to fall into the water and sink before anyone could retrieve it. I do not believe that the crew member realized the radio was attached when he passed over the backpack.

I hope this is sufficient to get the Harris County folks' radio replaced.

Let me know?????

MikeS

Mr Zehner,

Here's the ICS-213rr for the radio that you requested.
